

SKY GAZING

How do we understand the nature that surrounds us? How do you teach in school what Nature is? How do we think of animals, water, the earth, the sky, or the heavens?

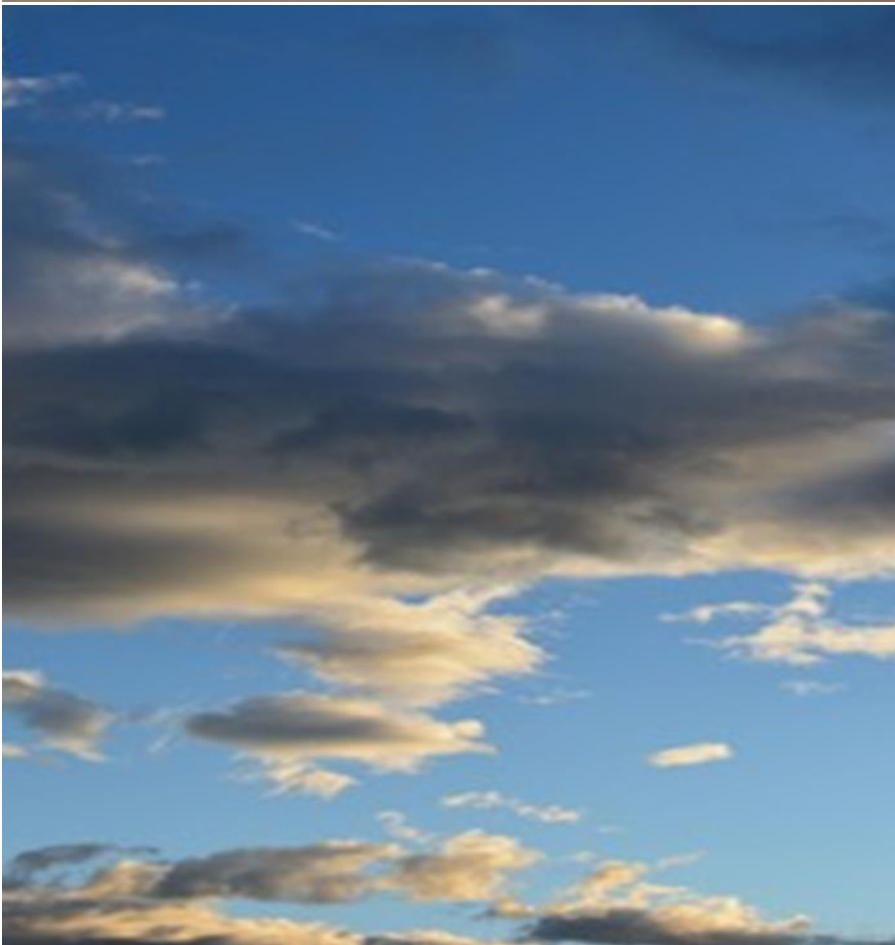

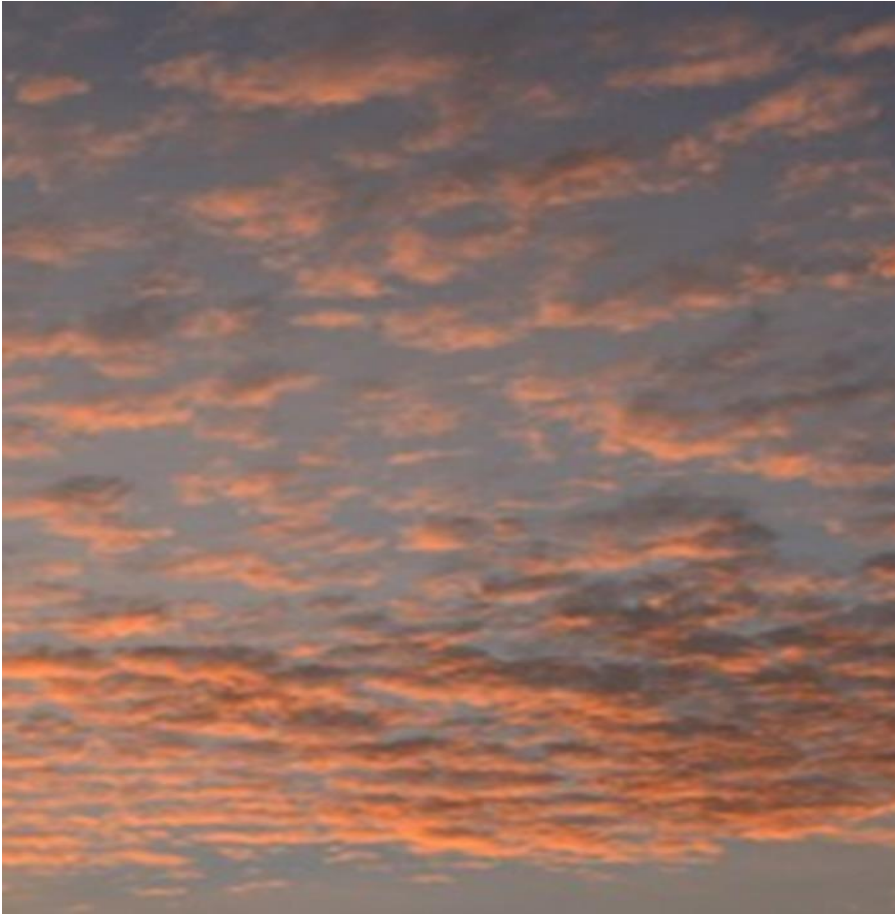

What are the values that prevail in our society? On what principles is our current rationality based? How have we affected the troposphere and the stratosphere?

Why, despite having so much knowledge and scientific certainty about the current situation, can we not reverse the path of destruction on which we are set?

What can we learn from Nature – and from ourselves – to reverse this course?

We confuse values with commodities and neglect the essentials because we have forgotten them. Archaic societies kept that essence alive by reproductive rituals and architecture. Historical Linearity was not denied or unknown, but it was known that the integration of reality with the cosmos could only be achieved through sacralization, which entailed an ontological significance. The world was one, all was connected and sacred.

The world has ceased to be sacred.

Humanity became estranged from nature and reduced it to an object or resource.

At a time when hyper-specialization prevails in knowledge, the rupture of the idea of the sacredness of the world and the unity of the human being with the cosmos became the most primordial ignorance of the functioning of nature.

Before individualized objects and structures, what prevailed in nature was the systemic fractal interconnection of the existing; before structures, there were processes; before Linearity, there was circularity, the circularity of the heavens.

This photo essay strives to promote within our collective consciousness the importance of the atmosphere and all it contains and how vital and unique it is to planet Earth.

Eugene Mangia Guerrero, Arq. Mgtr.

Pontifical Catholic University of Ecuador,
Principal Professor
Architect by Pratt Institute, Brooklyn, N.Y.,
scholarship holder
Researcher by the postgraduate MEP program
at Arizona State University, Tempe, AZ.
Educator by the postgraduate MEd program of
the Universidad San Francisco de Quito. Quito,
Ecuador.
He has held several academic positions such as
Dean (E), Vice-Dean and Director of the School
of Design of the Faculty of Architecture, Design
and Arts of the Pontifical Catholic University of
Ecuador.
Founding member and responsible for the area
of History and Theory of the College of
Architecture, San Francisco University of Quito.
Quito, Ecuador.
Founding member and responsible for the
introductory level courses, of the SEK University.
Quito, Ecuador.
Guest Lecturer and thesis director at the
Graduate Institute Faculty of Architecture and
Urbanism, Central University of Ecuador. Quito,
Ecuador.
Currently, granted a scholarship by Ohio
University, Athens, Oh., for the COIL program
(Collaborative Online International Learning).
Founding partner Mangia-Fegan Design.

JOURNAL ONLINE CONTAINER OF NON ARCHITECTURE

NON ARCHITECTURE

Non-architecture seeks to reinvent spatial design by questioning the base, the fundamentals, and the conventions of an architect's work. With its international editorial team and a design community of thousands of people, Non-Architecture develops initiatives, mediums, and projects to explore innovative design solutions and experimental collaboration models.

Non-Architecture is everything that is not architecture yet.
